

SOUND SEAL

Product Update

September 14, 2009

What's new

- 1 LEED eligible
- 2 Same NRC ratings
- 3 No difference in flammability

Sound Seal is pleased to inform you that we will now be featuring Knauf insulation's "Ecosse" fiberglass

**Sound Seal now proudly carries
"Green" fiberglass which is fully
recyclable**

On unbound rolls or products with scrim facing you will start to notice our new fiberglass. This "Green" fiberglass is actually brown in color and may help projects meet green building standards for recycled content and regional materials.

- Formaldehyde-Free
- Contains a minimum of 30% post-consumer recycled bottle glass
- Organic based bonding agent, which is 70% less energy intensive than traditional petroleum-based bonding agents.

Fully converting to this new fiberglass will take some time so you may continue to see some of the yellow fiberglass you have become accustomed to.

If you'd like to learn more about the "Ecosse" fiberglass or what Knauf insulation has done to reduce their carbon footprint please visit the following website:
